

ADDRESSING CHILDREN'S MENTAL HEALTH: THE DTAP® SOLUTION

The Knowledge Center at Chaddock, in partnership with The Tracy Family Foundation is pleased to present 10, FREE, in-person, community presentations.

These sessions, designed for community members, professional educators, behavioral health workers, and any other child and family serving individuals will utilize the principles and concepts of Chaddock's Developmental Trauma and Attachment Program® Treatment Model, and soon-to-be-released DTAP® Manual.

This initiative aims to address the growing child mental health crisis by offering early detection and prevention strategies.

***CEs available for
Social Workers and Counselors***
